Problem Books in Mathematics - The following problem shows the beauty of elementary number-

theory. It combines diverse ideas and techniques and the result is at least beautiful. This one is also a classic problem, that appeared in lots of mathematics competitions. Example 6. Prove that for any natural number n , $n!$ is a divisor of $\sum_{k=0}^{n-1} \binom{n}{k} k$.

- This book teaches the thorough knowledge of our miserable state of condition in a mathematical way when we were found by OUR SAVIOUR, W. D. FARD. 1. The uncle of Mr. W. D. Fard lived in the wilderness of North America and he lived other than his own self, therefore, his pulse beat seventy-eight times per minute and this killed him in forty-five years of age.
