Nitrogen is a chemical element
with symbol N and atomic
number 7. It was first discovered
and isolated by Scottish physician
Daniel Rutherford in 1772.
Although Carl Wilhelm Scheele
and Henry Cavendish had
independently done so at about
the same time, Rutherford is
generally accorded the credit
because his work was published
first. Mon, 26 Mar 2018 23:56:00

Online Japanese N5 Course(All
15 lessons) | Udemy - A fuzzy
control system is a control system
based on fuzzy logicâ€”a
mathematical system that
analyzes analog input values in
terms of logical variables that
take on continuous values
between 0 and 1, in contrast to
classical or digital logic, which
operates on discrete values of
either 1 or 0 (true or false,
respectively). Thu, 24 Mar 2011

Overview. EED is a PC-program
for vertical borehole heat
exchanger design. Its easy of use,
short learning curve, quick
calculation times and inherent
databases make EED a useful tool
in everyday engineering work for
design of ground source heat
pump system (GSHP) and
borehole thermal storage. Fri, 18
