Gas tungsten arc welding -
Wikipedia - Gas pipeline
welding. The welder is using a
TIG torch for a root pass on the
weld joint. The technique of
rocking the torch from side to
side is called "walking the cup".

Gas metal arc welding (GMAW),
sometimes referred to by its
subtypes metal inert gas (MIG)
welding or metal active gas
(MAG) welding, is a welding
process in which an electric arc
forms between a consumable wire
electrode and the workpiece
metal(s), which heats the
workpiece metal(s), causing them
to melt and join. Sun, 17 Jun
